

### BRACKETS

The ability to flex our in-house fabrication unit, means we supply projects with the most complex of brackets & the highest of volumes.

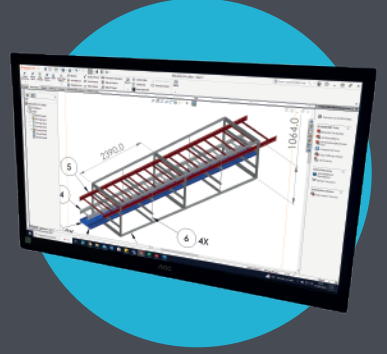

### FABRICATION

Our market leading fabrication unit gives us the capability & capacity to fabricate specialist CMS solutions for projects in the UK & overseas.

### SUPPORTS

Welded frames of steel box section, slotted channel or C-channel (or combinations of) in a range of sizes, materials and finishes.

### IN-HOUSE DESIGN

Our CAD team are experienced in value-engineering CMS systems to meet project requirements, challenges, budgets and timescales.

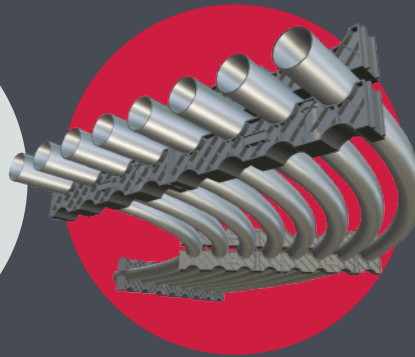

### FLOOR BOXES

Floor boxes available in both cavity and screed can be configured to suit your own custom requirements. Available in plastic, brass, powder coated or stainless steel.

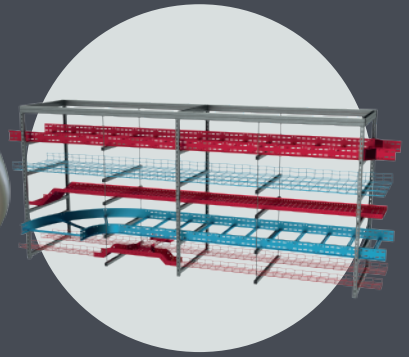

### MODULAR RISERS

We design and manufacture modular solutions offsite that deliver consistent high quality and certainty for reduced onsite labour, installation time and embodied carbon.

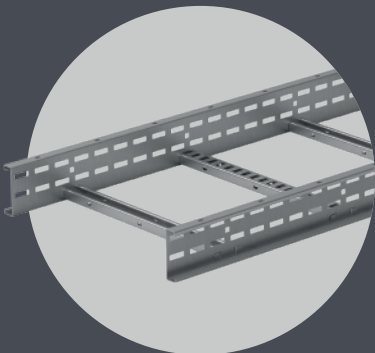

### DATALINE EMT

Electrical metallic tubing from 50-110mm with a full range of accessories that create a complete secure fibre delivery solution.

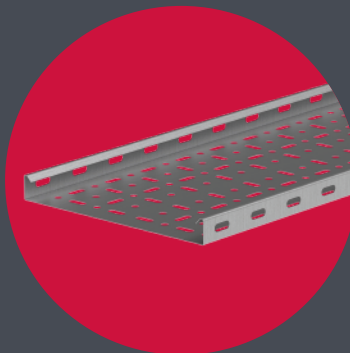

### MODULAR FRAMES

Containment modules to minimise installation time. From single tier Unistrut brackets to multiple 6 metre fully populated containment corridors.

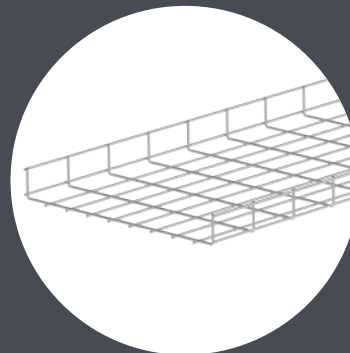

### LADDER

Our enhanced cable ladder range available in 5 x side heights. Widths from 150mm to 1200mm including changes of direction, fittings, couplers and accessories. Available in PG, Stainless Steel 316 & Magnelis®

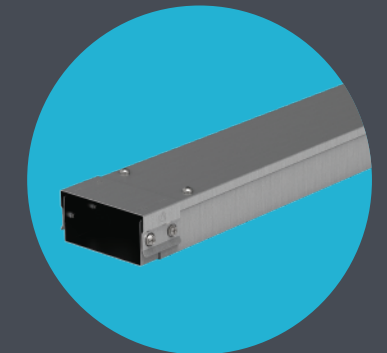

### TRAY

Standard & bespoke cable trays for every installation. RMS provide both flexibility of choice and capacity for large volume projects.

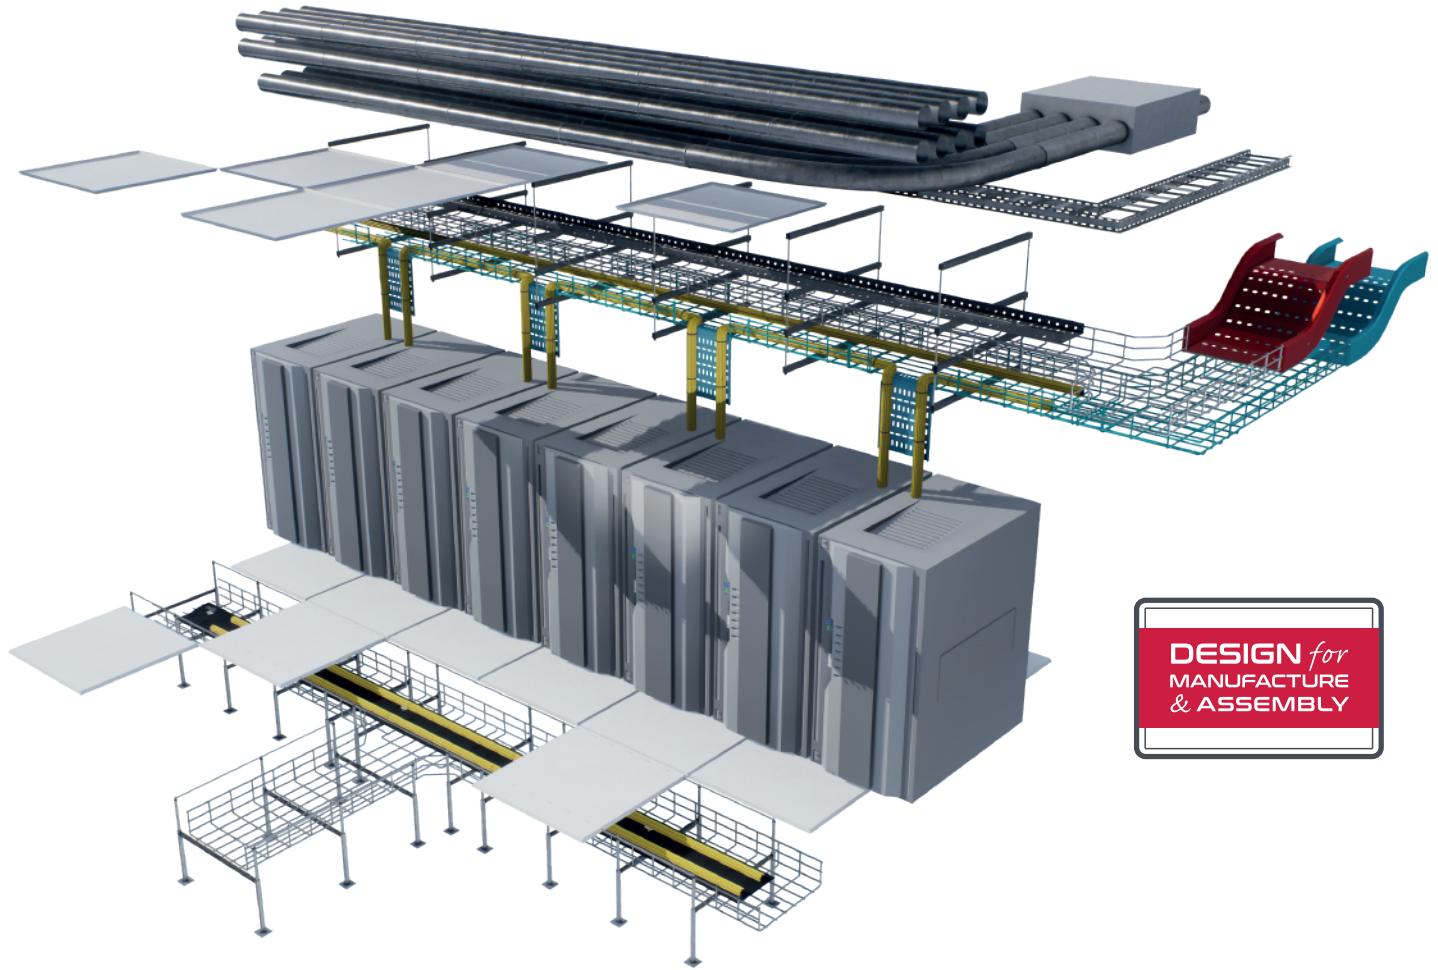

### BASKET

Extensive range of cable basket. 50-900mm widths & 35-200mm sidewalls in a variety of finishes.

### TRUNKING

RMS have unrivalled depth & expertise supplying demanding projects in IP4X, security systems, and Magnelis®.

The world of data storage continues to grow and become more complex, frequently throwing more challenging and exciting propositions for **DATA CENTRE** construction and the **CABLE MANAGEMENT SYSTEMS** within.

RMS understand this global market sector, demonstrating continual success in the UK and Europe with **LARGE VOLUME, FAST TRACK, HIGH VALUE PROJECTS**. We will find solutions for **SPECIFIC DESIGN CRITERIA** and provide quality prefabricated solutions for your bespoke installation.

Our proven track record includes **SUCCESSFUL COLLABORATIONS** with global design consultants, contractors and end clients, including **Google**, where our systems are part of the approved specification for **HYPERSCALE DEPLOYMENTS**.
